

MARLIN 3D

CONFIGURATOR

PCD tools tailored
specifically for your project

Ø 2,02 ±0,02

(Ø 1,57 ±0,02)

R 10,01

YOUR TOOL. YOUR CHOICE. IN SECONDS.

THE ZECHA ONLINE CONFIGURATOR FOR PCD TOOLS

With the new PCD configurator, ZECHA offers a smart way to design precision tools quickly, easily, and exactly to your requirements.

Forget standard – go custom: Choose neck length, radius, and material tailored to your application – directly in the shop.

Thanks to an intuitive user interface and intelligent preselection, you'll receive a fully configured tool in no time – including price preview and feasibility check.

No waiting, no follow-up questions – straight to ordering.

Fast. Flexible. Precise. For modern production processes.

Custom Tool Configuration

Select radius, length, and other parameters – perfectly matched to your application.

Automatically Matched Cutting Geometry

Based on the selected material, the configurator automatically suggests the optimal geometry for ideal cutting conditions.

Instant Price per Unit

When you are logged into your account, you will see the exact tool price immediately after entering the quantity.

No Waiting, No Clarifications Needed

All configurations are technically verified – you can order right away.

Key Features at a Glance

- **Usable lengths:** depending on diameter, between 3 and 20 mm
- **Corner radius:** at least 5 options per diameter
- **Minimum order quantity:** 2 pieces
- **Price:** depends on quantity – shown live in the configurator
